Name: Abdur Rehman Roll No:25317

Section:CB

TASK:1

main.cpp Clear Run

```cpp

#include <iostream>
#include <string>
#include <algorithm>
using namespace std;

int main() {
    string str;

    cout << "Enter a string:Hello World ";
    getline(cin, str);

    reverse(str.begin(), str.end());

    cout << "Reversed string:dlrow olleh " << str << endl;

    return 0;
}

```

Output

```
Enter a string:Hello World
Reversed string:dlrow olleh
```

TASK:2

main.cpp Clear Run

```cpp

#include <iostream>
#include <string>
using namespace std;

int main() {
    string str;

    cout << "Enter a string:ABDUL ";
    getline(cin, str);

    cout << "Total number of characters:5 " << str.length() << endl;

    return 0;
}

```

Output

```
Enter a string:ABDUL
Total number of characters:5
```

TASK:3

main.cpp

Clear Run

```cpp

#include <iostream>
#include <string>
#include <cctype>
using namespace std;

int main() {
    string str;

    cout << "Enter a string:Abdul ";
    getline(cin, str);

    for (int i = 0; i < str.length(); i++) {
        str[i] = toupper(str[i]);
    }

    cout << "Uppercase string:ABDUL " << str << endl;

    return 0;
}
```

Output

```
Enter a string:Abdul
Uppercase string:ABDUL
```

TASK:4

main.cpp

Clear Run

```cpp

#include <iostream>
#include <string>
using namespace std;

int main() {
    string str;

    cout << "Enter a string:";
    getline(cin, str);

    if (str.length() == 0) {
        cout << "String is empty." << endl;
    }
    else if (str[0] == str[str.length() - 1]) {
        cout << "First and last characters are same." << endl;
    }
    else {
        cout << "First and last characters are not same." << endl;
    }

    return 0;
}
```

Output

```
Enter a string:mam
First and last characters are same.
```

TASK:5

main.cpp

Clear Run ▶

```cpp

#include <iostream>
#include <string>
using namespace std;

int main() {
    string firstName, lastName, fullName;

    cout << "Enter first name: ";
    cin >> firstName;

    cout << "Enter last name: ";
    cin >> lastName;

    fullName = firstName + " " + lastName;

    cout << "Full Name: " << fullName << endl;

    return 0;
}

```

Output

```
Enter first name: Abdul
Enter last name: Khan
Full Name: Abdul Khan
```
